**STANDARD DENSITY CONNECTOR SAVER / GENDER CHANGER**

AD and HAD Series available in five shell sizes. Standard density connector savers and gender changers. AD series female contacts feature a rugged open entry design for use with professional/industrial quality applications. HAD series female contacts feature the PosiBand® closed entry design for even higher reliability or military quality D-subminiature connectors.

**HIGH DENSITY CONNECTOR SAVER / GENDER CHANGER**

DAD Series available in six shell sizes. The high density connector savers and gender changers. DAD female contacts can be supplied in either open entry design for use with professional/military quality applications or PosiBand closed entry designs for use in any application requiring high performance characteristics including military.

**COMBO-D CONNECTOR SAVERS**

ACBDP and ACBMP Series available for all standard Combo-D variants in shell sizes 1 through 6. Combo-D connector savers with size 20 and size 8 contacts. ACBDP series female contacts feature a rugged open entry design for use in professional/industrial quality applications. ACBMP series female contacts feature the PosiBand® closed entry design for even higher reliability including military.

**SPACE-D CONNECTOR SAVERS**

SAD, SADD and SACBMP Series. Standard density, high density or Combo-D variants available. High reliability, non-outgassing, low magnetism connectors conforming to applicable material, dimensional and performance requirements of GSFC S-311-P4, GSFC S-311-P10 and DSCC specification 85039. All three series’ female contacts feature the PosiBand® closed entry design suitable for high performance applications including space flight.
AD and HAD series connectors are suitable for use in any applications requiring high performance characteristic. The normal density AD and HAD series are available in five standard connector variants of 9, 15, 25, 37 and 50 contacts.

ACBDP and ACBMP series connectors are suitable for use in any applications requiring high performance characteristic. The normal density ACBDP and ACBMP series are available in standard Combo-D connector variants.

ACBDP and ACBMP series connectors utilize precision machined contacts for strength and durability. The ACBDP female contact features a rugged “Open Entry” design or PosiBand “Closed Entry” design for even higher reliability. ACBMP connectors features PosiBand “Closed Entry” contacts and military contact plating.

ACBDP and ACBMP series connectors can be mated to a connector which would normally experience high numbers of mating cycles. The ACBDP/ACBMP connector can be easily replaced, “Saving” a connector which is not easily replaced.

These connectors can also be used as a “gender changer”. Connector Savers are also available in standard and high density D-subminiature versions, please consult our Professional, Industrial and Military Performance D-subminiature Connectors catalog for more information.

For high density 8W2, 19W1 and 45W2 adapter variants contact Technical Sales.
