Experience

- Founded in 1966
- Involvement in the development of international connector specifications through EIA®, IEC and ISO as well as PICMG®.
- Introduction of new and unique connector products to the electronics industry.
- Patent holder for many unique connector features and manufacturing techniques.
- Vertically integrated manufacturing – raw materials to finished connectors.

Technology

- Expertise with solid machined contacts provides a variety of high reliability connectors including high current density power connectors.
- Quality Assurance lab is capable of testing to IEC, EIA, UL, CUL, military and customer-specified requirements.
- In-house design and development of connectors based on market need or individual customer requirements.
- Internal manufacturing capabilities include automatic precision contact machining, injection molding, stamping, plating operations and connector assembly.
- Manufacturing locations in southwest Missouri, U.S.A. (headquarters); Puerto Rico, France, China, Singapore, and India. Total square footage: 407,441.

Support

- Compliance to a variety of international and customer specific environmental requirements.
- Large in-house inventory of finished connectors. Customer specific stocking programs.
- Factory direct technical sales support in major cities worldwide.
- One-on-one customer support from worldwide factory locations.
- World class web site.
- Value-added solutions and willingness to develop custom products with reasonable price and delivery.

Positronic Provides Complete Capability

Mission Statement

“To utilize product flexibility and application assistance to present quality interconnect solutions which represent value to customers worldwide.”

Information in this catalog is proprietary to Positronic and its subsidiaries. Positronic believes the data contained herein to be reliable. Since the technical information is given free of charge, the user employs such information at his own discretion and risk. Positronic Industries assumes no responsibility for results obtained or damages incurred from use of such information in whole or in part.

The following trademarks are owned by Positronic Industries, Inc.: Positronic Industries, Inc.®, Positronic®, Connector Excellence®, P+ logo®, PosiBand®, PosiShop®, Optik-D™, and The Science of Certainty®. The color blue as it appears on various connectors is a trademark of Positronic Industries, Inc., Registered in U.S. Patent and Trademark Office.
This catalog should be accompanied by copies of Positronic’s high reliability D-subminiature connector catalogs. Contact your sales representative or visit www.connectpositronic.com for copies of these catalogs.

STANDARD AND HIGH DENSITY D-Subminiature CONNECTORS

CONNECTOR SAVERS GENDER CHANGERS

PRESS-IN CONNECTORS

Du AL-PORT STACKED CONNECTORS

ENVIRONMENTAL D-Subminiature CONNECTORS

STANDARD AND HIGH DENSITY COMBO-D CONNECTORS

HIGH PERFORMANCE D-Subminiature CONNECTORS, INCLUDING SPACEFLIGHT

TERMINATION TYPES:
Signal, Power, High Voltage, Shielded, and Thermocouple

MULTIPLE PERFORMANCE LEVELS FOR BEST COST/PERFORMANCE RATIO

DIMENSIONS ARE IN INCHES (MILLIMETERS). ALL DIMENSIONS ARE SUBJECT TO CHANGE.
# TABLE OF CONTENTS

## MOUNTING BRACKETS
- RIVETED ON RIGHT ANGLE (90°) MOUNTING BRACKETS ................................................. 1
- PUSH-ON FASTENER FOR RIVETED ON RIGHT ANGLE (90°) MOUNTING BRACKETS ......................................................................................................................... 1
- RAPID INSTALLATION INTO PRINTED CIRCUIT BOARD
- RIGHT ANGLE (90°) METAL MOUNTING BRACKET .......................................................... 2
- SUPPLIED WITH RIVETED-ON BRACKET ASSEMBLIES
- RIGHT ANGLE (90°) METAL MOUNTING BRACKET .......................................................... 2
- SECURED TO CONNECTOR WITH THREADED FASTENERS
- RIGHT ANGLE (90°) PLASTIC MOUNTING BRACKET ......................................................... 3
- SECURED TO CONNECTOR WITH THREADED FASTENERS
- RIGHT ANGLE (90°) PLASTIC MOUNTING BRACKET WITH THREADED INSERT .............. 3
- SECURED TO CONNECTOR WITH THREADED FASTENERS
- RIGHT ANGLE (90°) PLASTIC MOUNTING BRACKET WITH ALIGNMENT BAR ................ 3
- SUPPLIED WITH STANDARD DENSITY MIL-DTL-24308/23 AND /24 CONNECTORS

## POSTS AND SPACERS
- SWAGED SPACER .................................................................................................................. 4
- SWAGED SPACERS ................................................................................................................ 4
- SWAGED LOCKNUT ............................................................................................................... 4
- SWAGED SPACER WITH PUSH-ON FASTENER ..................................................................... 4
- RAPID INSTALLATION INTO PRINTED CIRCUIT BOARD
- THREADED POST .................................................................................................................... 5

## PANEL / BULKHEAD MOUNTING OPTIONS
- MOUNTING OPTIONS ............................................................................................................ 6
- PANEL CUTOUTS ..................................................................................................................... 7-8

## FERRITE INDUCTOR
- FERRITE INDUCTOR BAR FOR EMI/RFI NOISE SUPPRESSION ........................................... 9

## CABLE ADAPTERS (HOODS / BACKSHELLS)
- TYPICAL JACKSCREW LOCKING / CODING OPTIONS ......................................................... 11
- TYPICAL QUICK DISCONNECT LOCKING DEVICE OPTIONS .............................................. 12
- LIGHTWEIGHT ALUMINUM CABLE ADAPTER (HOOD) ..................................................... 13
- GENERAL INFORMATION
- LIGHTWEIGHT ALUMINUM CABLE ADAPTER (HOOD) ..................................................... 14
- WITH FIXED FEMALE JACKSCREWS

**Material:**
- **P** - Brass with zinc plate and chromate seal or tin plate; stainless steel, passivated.
- **P2** - Nylon.

---

Positronic’s D-subminiature Accessories are available in RoHS compliant materials. These materials will be supplied when the connector part number designates the RoHS modifier “/AA”.

---

**Connectors Designed To Customer Specifications**

Positronic D-subminiature connectors can be modified to customers specifications.

**Examples:** select loading of contacts for cost savings or to gain creepage and clearance distances; longer printed circuit board terminations; customer specified hardware; sealing for water resistance.

**Contact Technical Sales with your particular requirements.**

TYPICAL JACKSCREW LOCKING OPTIONS

Jackscrew options are available with “A”, “G”, “H”, “J”, “L”, “QH”, “W”, “Y” and “Z” cable adapters listed in quick reference chart on page 10. EMI/RFI metal “G” and lightweight aluminum “A” cable adapters are shown in illustration for reference only.

For more information regarding locking/coding jackscrew systems “E”, “T2”, “E6”, “T6” and other jackscrew options, see page 27.

DIMENSIONS ARE IN INCHES [MILLIMETERS]. ALL DIMENSIONS ARE SUBJECT TO CHANGE.
TYPICAL QUICK DISCONNECT LOCKING DEVICE OPTIONS

Lock actuation lever “VL” and front mounted locking tabs “V3” are available with “A”, “G”, “H”, “J” and “L” cable adapters listed in quick reference chart on page 10.

Back mounted locking tabs “V5” options are also available. For detailed information on locking/coding systems see page 28.

Plastic cable adapter “L” and front panel mount “V3” locking tab are shown in illustration for reference only.

**General Information**

This product has been designed for use in applications as a lightweight, EMI cable adapter for D-subminiature connectors. The features of the product are outlined below. Please contact Technical Sales for pricing and additional options.

**Ground Screws**
- Sized and spaced for use with 0.250 inch [6.35mm] diameter ring terminals
- Ground shelf height and ground screw length allow for stacking of ring terminals
- Holes are pre-tapped for ease of installation
- Ground screws are located outside the exiting wire path to facilitate wire routing
- Ground holes are tapped through to the outside which provide for optional external grounding

**Aperture / Strain Relief**
- Appropriate for high density wire bundles using twisted, shielded pairs
- Cable clamps can be “spooned” to provide strain relief for small wire bundle
- Wide factor allows the user to easily meet bend radius requirements

**Spacious Interior**
- Shape maximizes internal area which facilitates harness assembly
- No obstructions behind any portion of the connector body allows cable adapter to be used with Combo-D connectors

**Thumb Grip**
- Grip facilitates installation and removal in tight spaces

**Locking System**
- Available with jackscrews or actuation lock system

**Technical Characteristics**

**Material and Finishes:**
- **Cable Adapter & Cable Clamps:** Aluminum, aluminum with electroless nickel plate; aluminum with yellow anodize; aluminum with yellow chromate conversion. Zinc content is 1% maximum.
- **Jackscrews & Screws:** Steel with nickel plate; brass with zinc plate and chromate seal. Stainless steel options available, contact Technical Sales.
- **Actuation Lock System:** Steel with nickel plate.

**Mechanical Characteristics:**
- **Ground Screws:** Can accept up to 0.250 inch [6.35mm] diameter ring terminal.
- **Locking System:** Jackscrews and quick disconnect lock system.

**Electrical Characteristics:**
- **Range of Operation, Calculated Method:** 2 GHz minimum.

**Cable Adapters (Hoods/Backshells)**

**D25000ANVL0** - Lightweight aluminum cable adapter with vibration lock lever, pictured with connector installed.

**DIMENSIONS ARE IN INCHES [MILLIMETERS]. ALL DIMENSIONS ARE SUBJECT TO CHANGE.**
# CABLE ADAPTERS (hoods/backshells)

**D-SUB Accessories**

**Code GE - General Information**

- EMI/RFI shielding
- Die cast zinc construction to maximize shielding and ruggedness.
- Well-proportioned to allow ample room for internal conductors.
- Central grounding post inside the cable adapter.
- Cable clamps and various cable exit options offered.
- Unused cable openings EMI/RFI protected using included metal plugs.

- Crimp ferrule system available for greater shielding performance and greater cable retention; see page 20.
- Offered with rotating jackscrews or quick disconnect locking systems.
- Supplied for D-subminiature connector housing sizes 1 - 6.

The EMI/RFI hood and adapters shown on pages 17 - 20 of this catalog are manufactured by **Inotec Electronics**. Positronic serves as the North American distributor of these hoods and adapters.

**FEATURES:**

- Gripping shoulders enable trouble-free extraction of the connector assembly even with tightly packed aligned cable adapters.
- Rotating jackscrews offer the most secure mechanical locking of the connector system.
- Standard height cable adapters for use with connector shell sizes 1 and 2 are available with a top or side cable exit option. Contact Technical Sales for details.
- Cable adapters for use with connector shell sizes 3 - 5 are designed with three (3) cable entries and can permit the looping through of cables. Cable entries not used are sealed with supplied metal plugs to maintain EMI/RFI shielding qualities.
- Two (2) height options are available, one being a low profile option (as shown on the left side of this page). An increased height option (as shown on the right side of this page) is offered for use with power conductors and coaxial cable, such as might be used with the Positronic CBD/CM series connectors.
- Grounding to the cable adapter may be accomplished by fastening wires inside cable clamps and various cable exit options offered.

**DIMENSIONS:**

- All dimensions are in inches (millimeters).
- All dimensions are subject to change.

**NOTES:**

- 1. To prevent stripping of the cable adapter assembly screws, we recommend using Pozidriv screwdriver bits available from stock using part number 9535-2-2-0; contact Technical Sales. Standard height GE cable adapter use the Pozidriv style jackscrews. Internal hex jackscrews are available for the standard height, but require an M5.
- 2. The extended height cable adapters use an internal hex jackscrew.
- 3. These cable adapters are supplied with one (1) cable clamp set and one (1) opening plug.
- 4. These cable adapters are supplied with one (1) cable clamp set and two (2) opening plugs.
- 5. See page 20 for optional Crimp Ferrule System.

NOTES:

*1 To prevent stripping of the cable adapter assembly screws, we recommend using Posidriv screwdriver bits available from stock using part number 9535-2-2-0, contact Technical Sales. For the mounting screws, we recommend using a standard Phillips head screwdriver bit.

*2 The extended height cable adapters use an internal hex jackscrew.

*3 These cable adapters are supplied with one (1) cable clamp set and one (1) opening plug.

*4 These cable adapters are supplied with one (1) cable clamp set and two (2) opening plugs.

*5 See page 20 for optional Crimp Ferrule System.

FEATURES:

- Rapid locking system stays in a constantly-locked position, utilizing a blade spring. System is unlocked by simply pressing the slide latch. Locking is automatic upon coupling to the mating connector.

- Gripping shoulders enable trouble-free extraction of the connector assembly even with tightly packed aligned cable adapters.

- Cable adapters for use with connector shell sizes 2 - 5 are designed with three (3) cable entries and can permit the looping through of cables. Cable entries not used are sealed with the supplied metal plugs to maintain EMI/RFI shielding. Cable adapters for use with connector shell size 1 are designed with only two (2) side openings.

- Two (2) height options are available, one being a low profile option (as shown on the left side of this page). An increased height option (as shown on the right side of this page) is offered for use with power conductors and coaxial cable, such as might be used with the Positronic CBD/CBM series connectors.

- Grounding to the cable adapter may be accomplished by fastening wires inside cable adapter with an M3 threaded Phillips head screw.

For information regarding QUICK DISCONNECT LOCKING DEVICE, see page 28.

DIMENSIONS ARE IN INCHES [MILLIMETERS]. ALL DIMENSIONS ARE SUBJECT TO CHANGE.
EMI/RFI METAL CABLE ADAPTER (HOOD)¹
WITH M3 THREADS

TO OBTAIN THE FIXED FEMALE JACkScrews (SHOWN BELOW),
ADD THE SUFFIX "-1193.6" TO THE END OF THE PART NUMBER.
Contact Technical Sales for additional ordering information.

FEATURES:
- Developed for applications where the highest degree of EMI/RFI shielding protection is required.
- The connector is recessed into the cable adapter so that additional EMI/RFI protection is gained.
- When this connector system is fully coupled, the front edge of the cable adapter presses against the panel that houses the mating connector, offering greater shielding.
- Cable adapters for use with connector shell sizes 3 - 5 are designed with three (3) cable entries and can permit the looping through of cables. Cable entries not used are sealed with supplied metal plugs to maintain EMI/RFI shielding qualities.
- Jackscrew locking system is supplied as a standard for secure mechanical coupling.
- Grounding to the cable adapter may be accomplished by fastening wires inside cable adapter with an M3 threaded Phillips head screw.

NOTES:
-¹ To prevent stripping of the cable adapter assembly screws, we recommend using Pozidriv screwdriver bits available from stock using part number 9535-2-2-0, contact Technical Sales.
-² These cable adapters are supplied with one (1) cable clamp set and two (2) opening plugs.
-³ See page 20 for optional Crimp Ferrule System.
CABLE ADAPTERS
(hoods/backshells)

CRIMP FERRULE SYSTEMS
FOR USE WITH CODE G CABLE ADAPTERS (HOODS)

The crimp ferrule system can be used with all Positronic code “G” cable adapters and is recommended when maximizing EMI/RFI protection is desired.

The crimp ferrule system optimizes the transition of the cable shield into the cable adapter in three ways. First: It provides a low impedance connection of the cable shield to the cable adapter which remains constant over time. Second: The system provides an EMI/RFI tight cable exit point. Third: The system provides for high mechanical retention of the cable in the cable adapter.

Application of the crimp ferrule system is quite simple. Once the cable insulation and shield are cut to the correct dimensions (#1), the crimp ferrule is placed over the cable and the crimp flange is inserted between the shield and the conductors (#2). The crimp ferrule is now slid over the cable insulation into position over the crimp flange and the crimp is made using Positronic-supplied hand press and die sets (#3). This assembly is then terminated to the connector and placed into the cable adapter (#4). Finally, the cover is placed on the cable adapter and secured using four (4) screws (#5).

To order the Positronic-supplied hand press, request part number 9520-0-0-0 or for hand crimp tool, request part number 9521-3-0-0. To order Positronic-supplied die sets, contact Technical Sales for ordering information, since die sets are customized based on the specific crimp flanges, crimp ferrules and cables used.

A crimp ferrule (left) and a crimp flange (right) shown above.

SAVE TIME AND MONEY!
Let Positronic support you by cablizing your d-subminiature connector selection.

Cable Assembly Design Support

We work closely with customers to:
1. Design assemblies in accordance with customer specifications.
2. Prepare wire harness connector configuration and performance specifications.
3. Design each system in accordance with applicable customer, domestic, and international standards.
4. Define and conduct performance and verification testing.

JACKSCREW SYSTEMS

CODE T, T2, T3, T4, T5, E, E2, AND E3

T\(^{1,2}\)/T2\(^{1,2}\)/T3\(^{1,2}\)/T4\(^{1,2}\)/T5\(^{1,2}\)

**FIXED FEMALE JACKSCREWS**

Material:\(^2\) T, T4, and T5 = Copper alloy or steel with zinc plate and chromate seal or tin plate; stainless steel, passivated.

T2 and T3 = Steel with zinc plate and chromate seal or tin plate; stainless steel, passivated.

**ROTATING MALE JACKSCREWS**

Material:\(^2\) Steel with zinc plate and chromate seal or tin plate; stainless steel, passivated.

E = slotted for screw driver

E3 = rotating male with internal hex for 3/32 hex drives

**NOTES:**

\(^1\) T, T2, T3, T4 or T5 jackscREW supplied on connectors in combination with other accessories may differ dimensionally, contact Technical Sales for more information.

\(^2\) T, T2, T3, T4, T5, E, E2 or E3 - Passivated stainless steel jackscrews available. Contact Technical Sales for ordering information.

\(^3\) Internal thread length of T & T2 jackscrews is 0.120 [3.05] nominal.

---

**CODING DEVICE (KEYING) JACKSCREW SYSTEMS**

**CODE T6 AND E6**

**FIXED MALE AND FEMALE JACKSCREWS**

**ROTATING MALE AND FEMALE JACKSCREWS**

**NOTES:**

\(^1\) T6 or E6 passivated stainless steel jackscrews available. Contact Technical Sales for ordering information.

\(^2\) For customer installations of knobs onto jackscrews, recommend set screw torque value of 16 in/oz. Recommend application of thread lock to set screw.

---

**DIMENSIONS ARE IN INCHES [MILLIMETERS]. ALL DIMENSIONS ARE SUBJECT TO CHANGE.**

---

Standard configuration shown. Various configurations can be supplied to allow for up to EIGHT CODING DEVICE OPTIONS, see page 33.
**Material:** Steel, nickel plate.

### FRONT MOUNTED LOCKING TABS

**Quick Disconnect Locking Device**

**Code V3**

![V3 Locking Tab Diagram]

### Dimensions

- **Panel Cutout:**
  - Maximum panel thickness: 0.310 [7.87]
  - Maximum mounting screw size: 0.062 [1.57]

- **Material:** Steel or copper alloy, nickel plate.
Positronic is known around the world for offering our customers flexibility when choosing connectors. In addition to allowing customers to create part numbers for particular applications, Positronic offers a wide variety of features and accessories within our products. Positronic is also eager to modify existing products to meet unique customer requirements. If you do not find what you need with this catalog, please contact us for assistance.

**FLARED CONNECTOR HOUSING (SHELLS)**

Flared connector housings provide a more generous misalignment characteristics than standard D-subminiature connector housings.

SIDE VIEWS OF FLARED CONNECTOR HOUSING (SHELL) FOR DD62M4R7000-1503.33 (shown left) and CBD25W3M85R7000-1503.33 (shown right)
LOW PROFILE MOUNTING BRACKET

Allows reduced distance from the top of the printed circuit board to the top of the connector compared to standard mounting brackets.

Mounting bracket material: Brass with zinc plate and chromate seal or tin plate.

CAPTIVE ALIGNMENT BARS

FOR ROBOTIC "PICK AND PLACE" APPLICATIONS

FOR MD-SERIES CONNECTORS, ADD THE SUFFIX "1298.3" TO THE END OF THE PART NUMBER. FOR ODD-SERIES CONNECTORS, ADD THE SUFFIX "1298.4" TO THE END OF THE PART NUMBER.

Material: Polyphenylenesulfide.

CUL-DE-SAC STYLE MOUNTING ACCESSORIES
CODE C5 AND C7

Non-conductive mounting brackets are necessary in many applications. Consult Technical Sales for complete part number.

Material: Steel with zinc plate and chromate seal or tin plate; stainless steel, passivated.

CODING DEVICE (KEYING) OPTIONS

Up to eight coding device options!

Jackscrews can be supplied in configurations to allow for up to four coding device options, as shown in the table below. An additional four coding device options can be achieved by reversing the connector genders.

## POWER

- **Contact Sizes:** 0, 8, 12, 16, 20, 22 and 24
- **Current Ratings:** To 200 amperes per contact
- **Terminations:** Crimp and fixed cable connector, straight solder, right angle (90°) compliant press-in and right angle (90°) compliant press-in
- **Configurations:** Multiple variants in a variety of package sizes
- **Compliance:** PICMG 2.11, PICMG 3.0, VITA 41, DSCC, GSFC S-311-P-4, GSFC S-311-P-10

### FEATURES:
- High current density
- Energy saving - low contact resistance
- AC/DC operation in a single connector
- Signal contacts for hardware management
- Blind mating - Sequential mating
- Wide variety of accessories
- Customer-specified contact arrangements
- Modular tooling which produces a single piece connector insert
- Hot swap capability
- AC/DC operation in a single connector
- Signal contacts for hardware management
- Blind mating - Sequential mating
- Wide variety of accessories
- Customer-specified contact arrangements
- Modular tooling which produces a single piece connector insert

## D-SUB MINIATURE

- **Contact Sizes:** 8, 16, 20 and 22
- **Current Ratings:** To 100 amperes
- **Terminations:** Crimp, wire solder, straight solder, right angle (90°) solder, and straight compliant press-in and right angle (90°) compliant press-in
- **Configurations:** Multiple variants in both standard and high densities, seventy connector housing sizes
- **Qualifications:** MIL-DTL-28748, SAE AS39029, CCITT V.35

### FEATURES:
- Four performance levels available for best cost/performance ratio: professional, industrial, military and space-flight quality
- Options include high voltage, coax, thermocouple and air coupling contacts; environmentally sealed and dual port connector packages including mixed density
- Broad selection of accessories
- Size 20 and 22 contacts suitable for use in carrying power
- P65, IP67

## RECTANGULAR

- **Contact Sizes:** 16, 20 and 22
- **Current Ratings:** To 13 amperes nominal
- **Terminations:** Crimp, wire solder, straight solder, right angle (90°) solder, and straight compliant press-in
- **Configurations:** Multiple variants in both standard and high densities, thirty package sizes
- **Compliance:** MIL-DTL-24308, GSFC S-311-P-4, GSFC S-311-P-10, SAE AS39029, DSCC

### FEATURES:
- Two performance levels available: industrial quality and military quality
- A wide variety of accessories
- Broad selection of contact arrangement and package sizes
- Connector coding device (keying) options

## CIRCULAR

- **Contact Sizes:** 8, 12, 16, 20 and 22
- **Current Ratings:** To 40 amperes nominal
- **Terminations:** Feedthrough is standard; flying leads and board mount available upon request
- **Configurations:** See D-subminiature and circular configurations above
- **Compliance:** Space-D32

### FEATURES:
- Intended for use as an electrical feedthrough in high vacuum applications
- Helium leakage rate at ambient temperature: < 5 x 10^-9 mbar.l/s under a vacuum of 1.5 x 10^-2 mbar
- Signal, power, coax and high voltage versions available
- Connectors can be mounted on flange assembly per customer specification

## CABLE

- **Contact Sizes:** 8, 12, 16, 20 and 22
- **Current Ratings:** To 40 amperes nominal
- **Terminations:** Feedthrough is standard; flying leads and board mount available upon request
- **Configurations:** See D-subminiature and circular configurations above
- **Compliance:** Space-D32

### FEATURES:
- Shorten the supply chain and reduce additional costs and delays by “cablizing” your Positronic connector selection
- Overmolding available
- Shielded and environmentally sealed versions available
- Power cables and access boxes which meet the SAE J2496 specification

## HERMETIC

- **Design assemblies in accordance with customer specifications.
- Prepare customer-configuration and performance specifications.
- Design each system in accordance with applicable customer, domestic, and international standards.
- Define and conduct performance and verification testing.
